INFRARED PHYSICS

Volume 32 **1991**

THIS ISSUE IS DEDICATED TO

FRITZ K. KNEUBÜHL

ON THE OCCASION OF HIS 60th BIRTHDAY

Contents

Guest Editorial	vii	
H. Alius and G. Dodel	1	Amplitude-, phase-, and frequency modulation of far-infrared radiation by optical excitation of silicon
J. S. Bakos	13	Kinetics of the cw optically pumped far-infrared lasers
Fielding Brown and Robert P. Hoyt	25	Sensitivity of the Avalanche Breakdown far-infrared photodetector
W. A. Cabanski and M. J. Schulz	29	Electronic and IR-optical properties of silicide/silicon interfaces
Paul D. Coleman, Richard S. Adams and Raymond R. Chu	45	Infrared chemiluminescence studies of the Li/I_2 system in the 10–30 μm wavelength range
Cui Dafu, Chen Zhenghao, Zhou Yueliang, Lu Huibin, Xie Yuanlin and Yang Gouzhen	53	Quantum well infrared detector with grating enhancement
T. A. DeTemple	57	Algebraic expressions for higher order AC stark shifts
Edgar Dießel, Hans Sigg and Klaus von Klitzing	69	A novel FIR spectrometer for cyclotron resonance emission studies in semiconductor research
Dinh Van Hoang and Tran Thi Thu Ha	75	Some characteristics of optical bistability in lasers containing saturable absorbers with Gaussian beam profiles
Tomoo Fujioka	81	Industrial gas lasers between 1.05–10.6 μm range
R. Geick, H. Greb, B. Hock, H. Jaitner, D. Maier, T. Pabst, W. Treutmann and S. Hosoya	91	Investigation of magnetic materials with millimeter wave and Fourier transform spectroscopy
A. S. Ghalumian, A. A. Glushko and K. B. Petrossian	105	YAG:Nd^{3+} slab laser with unstable resonator
R. Grunwald, H. Schönnagel, B. Voigt, J. Guhr, A. Mitreiter, I. Pinz and J. Bleck	109	Optimization of a coherent TE-CO_2-laser with variable reflectivity outcouplers
Yuichi Harada, Nobumitsu Hirose, Yoshinori Uzawa, Shigeru Yoshimori, Matsuo Sekine and Mitsuo Kawamura	129	Analysis of quasiparticle injection three-terminal device
M. Hausenblas, A. Wittlin and P. Wyder	139	FIR Fourier transform spectroscopy in high magnetic fields: investigations of low energy excitations in dilute magnetic semiconductors
Fritz Herlach and Luc Van Bockstal	145	Far-infrared and strong pulsed magnetic fields

Infrared Phys. is indexed/abstracted in Curr. Cont. ASCA, Cam. Sci. Abstr., Chem. Abstr. Serv., Curr. Cont./Phy. Chem. & Earth Sci., INSPEC Data., Curr. Cont. Sci. Cit. Indx, Curr. Cont. SCISEARCH Data., SSSA/CISA/ECA/ISMEC

INFRARED PHYSICS

Volume 32 — 1991

Hong Tang and Jerald R. Izatt	155	Untuned cavity resonator for use with pulsed infrared and far-infrared lasers
T. Hoshino, C. Maissen, H. Zogg, J. Masek, S. Blunier, A. N. Tiwari, S. Teodoropol and W. J. Borer	169	Monolithic $Pb_{1-x}Sn_xSe$ infrared arrays on Si prepared by low-temperature processes
Sonja Jovicevic, N. Konjevic, I. Ursu, M. Ganciu-Petcu, I. N. Mihailescu, Viorica Stancalie, A. Luches, M. Martino and V. Nassisi	177	IR-laser light coupling to metal surfaces
G. Jungwirt and W. Prettl	191	Nonlinear far-infrared photoionization of shallow acceptors in germanium
Junhao Chu, Zhengyu Mi and Dingyuan Tang	195	Intrinsic absorption spectroscopy and related physical quantities of narrow-gap semiconductors $Hg_{1-x}Cd_xTe$
M. F. Kimmitt	213	Detectors for infrared free electron lasers
Theodor Kostiuk and Drake Deming	225	A solar infrared photometer for space flight application
V. I. Kovalev	235	Four-wave mixing efficiency in InSb at 10.6 μm
Li Shichun and Lu Fei	245	A new λT relation of blackbody radiation and its application to study the greenhouse effect
Li Yao, Luo Xizhang and Lin Yikun	251	Transverse feedback enhancement effect in miniature optically pumped far-infrared lasers
A. Linskens, S. te Lintel Hekkert and J. Reuss	259	One and two photon spectra of SF_6, molecular beam measurements
W. Lüthy and H. P. Weber	283	The 3 μm erbium laser
V. K. Malyutenko	291	Thermal emission of semiconductors: investigation and application
K. A. Maslin, C. Patel and T. J. Parker	303	Far-infrared optical constants of a selection of zincblende structure crystals at 300 K
P.-V. Mercea, I. A. Ershov and V. A. Kravcenko	311	The effect of laser radiation on the permeation of gases through polymer membranes
K. D. Möller	321	Wavefront dividing interferometers
G. Moruzzi, F. Strumia, R. M. Lees and I. Mukhopadhyay	333	CH_3OH laser line assignments and frequency predictions
L. Nánai	349	Nonlinear phenomena induced by infrared laser light
H. Nowak	357	The longwave radiative heat transfer of the building envelopes
H. Okuda	365	Balloon observations of diffuse infrared emission in the Galaxy
Yu. N. Ponomarev	377	Photo-acoustic investigation of the interaction of laser radiation with molecules and inter-molecular interactions in gases
Hans-Peter Röser	385	Heterodyne spectroscopy for submillimeter and far-infrared wavelengths from 100 μm to 500 μm
K. Schätzel and E. O. Schulz-DuBois	409	Improvements of photon correlation techniques
Kurt Schröder and Dieter Schuöcker	417	Ultra compact high power CO_2-laser with coaxial electrodes

INFRARED PHYSICS

Volume 32 **1991**

A. J. Sievers and J. B. Page	425	A generalized Lyddane–Sachs–Teller relation for solids and liquids
I. N. Sisakian and V. A. Soifer	435	Infrared focusators, new optical elements
G. Strasser, K. Bochter, M. Witzany and E. Gornik	439	Improved tunable InSb FIR detectors
Paweł Szczepański	443	Saturation effects in distributed feedback lasers
V. Tank, H. Dietl and F. Lanzl	453	The temperature dependence of the time constants of thermoelectrical infrared detectors derived from their digitized step function response
A. A. Vigasin	461	Bound, metastable and free states of bimolecular complexes
V. I. Vlad	471	Degenerate four-wave mixing in colour center crystals with medium and high-intensity IR laser light
T. K. Wang and Jay N. Zemel	477	Polarized spectral emittance from periodic micromachined surfaces—III. Undoped silicon: the normal direction in shallow lamellar gratings
B. Ward and D. C. Emmony	489	Interferometric studies of the pressures developed in a liquid during infrared-laser-induced cavitation-bubble oscillation
W. J. Witteman and P. J. M. Peters	517	Efficient near-infrared electro-ionization lasers
Zhenghao Chen, Shaohua Pan, Simin Feng, Dafu Cui and Guozhen Yang	523	Theoretical and experimental study on infrared intersubband transitions of quantum wells
